Tell us about your business

Let us know what it is your business does, and who your ideal customers are, and we'll use this information to create a custom-designed website that's the perfect fit for your company.

What does your business do?

Edit

Jones Coffee Co. are a new coffee shop based in North West London. They sell coffees from all over the world and also offer branded products to customers - cups, saucers, aprons etc. This new venture (Jones Coffee Co) is run by a husband and wife team and they aspire to be North West London's most contemporary coffee shop. There are 8 people who work within the coffee shop so they emphasise customer service and much of their trade comes from early morning commuters and local university students. They are a very forward thinking business who want to attract people who appreciate good coffee and like a relaxed contemporary environment.

Who is your target audience?

Edit

Most of their trade would be a younger, cooler type of client as the University is a 2min walk away. Also, early morning commuters, stay at home parents during the day and also the elderly in the afternoons.

Do you already have a website?

Yes No

What is your business email address?

Edit

coffee@jonescoffee.co.uk

Any emails arriving from your new website will be sent to this address.

The customer has paid for a full logo and wants the design of the website to be a reflection of the logo style. The customers really does like the simple, minimal styling of the James Coffee example given. Possibly some subtle animation within the rollovers and when scrolling through the site? Site wide: Please add links to the shop at the bottom of all the pages. The customer really wants to promote the products they sell. Add a 'Sign Me Up' contact form that can capture the visitor's email address. Please add a checkbox titled 'Optional' and the following text: I'd like to receive the Jones newsletter once a month and understand I can unsubscribe at any time Add the DPD logo at the base with words 'Next Day Delivery' underneath

The shop should reflect the simple style of the website using the black and white theme requested.

The client likes the shop layout of this 'Essential Vintage' it'seeze site:<https://www.essentialvintage.co.uk/webshop/guys/>

They want the login / basket always displayed at the top of the site as per the demo site.

The logo is to have the full name: **Jones Coffee House**

The client wants a logo that reflects their style - simple, clever and contemporary. They are looking to create a symbol that could stand alone and be instantly recognisable as a coffee shop.

They want the logo to be clever by somehow creating a coffee symbol from their shop initials 'JCH'

They want the logo to be black and white but are open to suggestions about incorporating other colours into the design.

The logo will be used on coffee mugs, t-shirts and other branded elements so they would like the logo to remain compact but easy to read.

I have uploaded some example logo styles that the customer likes.
